Elliptical Trainers

SMOOTH • QUIET • FOLDABLE

THE *vision* *fitness* DIFFERENCE

Whether your vision is a slimmer body, a healthier heart, stress management, or if you simply enjoy exercise, Vision Fitness has the elliptical trainer to help you achieve your goals.

We began as a division of the Trek® Bicycle Company, where we pioneered the development of the smoothest, quietest, and most comfortable fitness bikes available. In 1996, Vision Fitness was spun off by the Trek® Fitness management team to continue to bring to market innovative fitness products. We offer you the same combination of quality, value, and performance that has made our founding company the most requested bicycle brand in America.

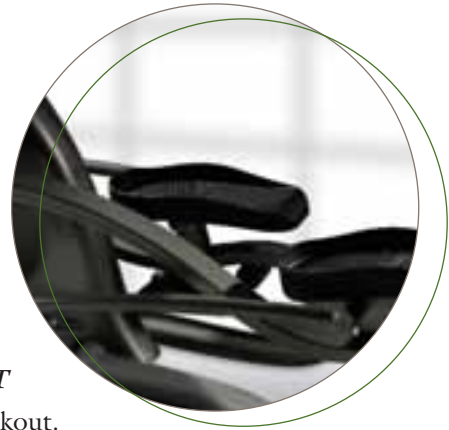

We continue to win “Best Buy” awards for our fitness products year after year. Try one at your local specialty fitness retailer; we are confident you will agree with the reviewers and find that our elliptical trainers are the most comfortable, smoothest, and quietest you have ever used.

To learn more about Vision Fitness and our complete line of quality fitness products, please visit our website: www.visionfitness.com.

The mission was clear: develop the smoothest and quietest elliptical trainer that fits into any home. Elliptical trainers offer a great workout that is both weight-bearing and non-impact; however, the best designs use a long pedal arm to achieve the smooth motion. These large designs can take up most of a room but, if you shorten the pedal arms, you get a jerky, uneven motion. Our patented folding system allows us to use extra-long pedal arms for smooth motion, with the added benefit of being easily folded out of the way.

Smooth

Our exclusive extra-long Bio-Radius™ pedal arms position your body over the center of the drive wheel for natural and fluid ergonomic positioning. Our extra-heavy-weight flywheel keeps the action smooth, while the variable durometer (softness) footpads found on *X6200HRT* & *X6600HRT* models ensure an extra-comfortable workout.

Quiet

Our Quiet-Glide™ drive technology utilizes a multi-ribbed supersilent Poly-V belt to assure an extra-quiet workout. The quieter the workout, the easier it is to read a book or watch TV, and you won't be disturbing others. Computer modeling on this drive system shows the expected life to exceed 20,000 hours—that's over 50 years of life when used one hour a day.

Foldable

Our patented *folding* design allows you to save space. Simply fold down the pedal arms when in use, and fold them up when you're done. The pedal arms and guide rails conveniently lock together in an upright position when you want to use the room for other activities.

We didn't invent the elliptical trainer concept, but we did make the first club-quality trainer that will fit into any home. Though relatively new to the fitness market, elliptical trainers have already earned their floor space in health clubs. They offer a great workout that is both weight-bearing and non-impact.

The Vision Fitness® line of dual-action elliptical trainers—from our entry-level **X6000** to our fully-loaded **X6600HRT** Commercial elliptical trainer—helps you achieve your fitness goals.

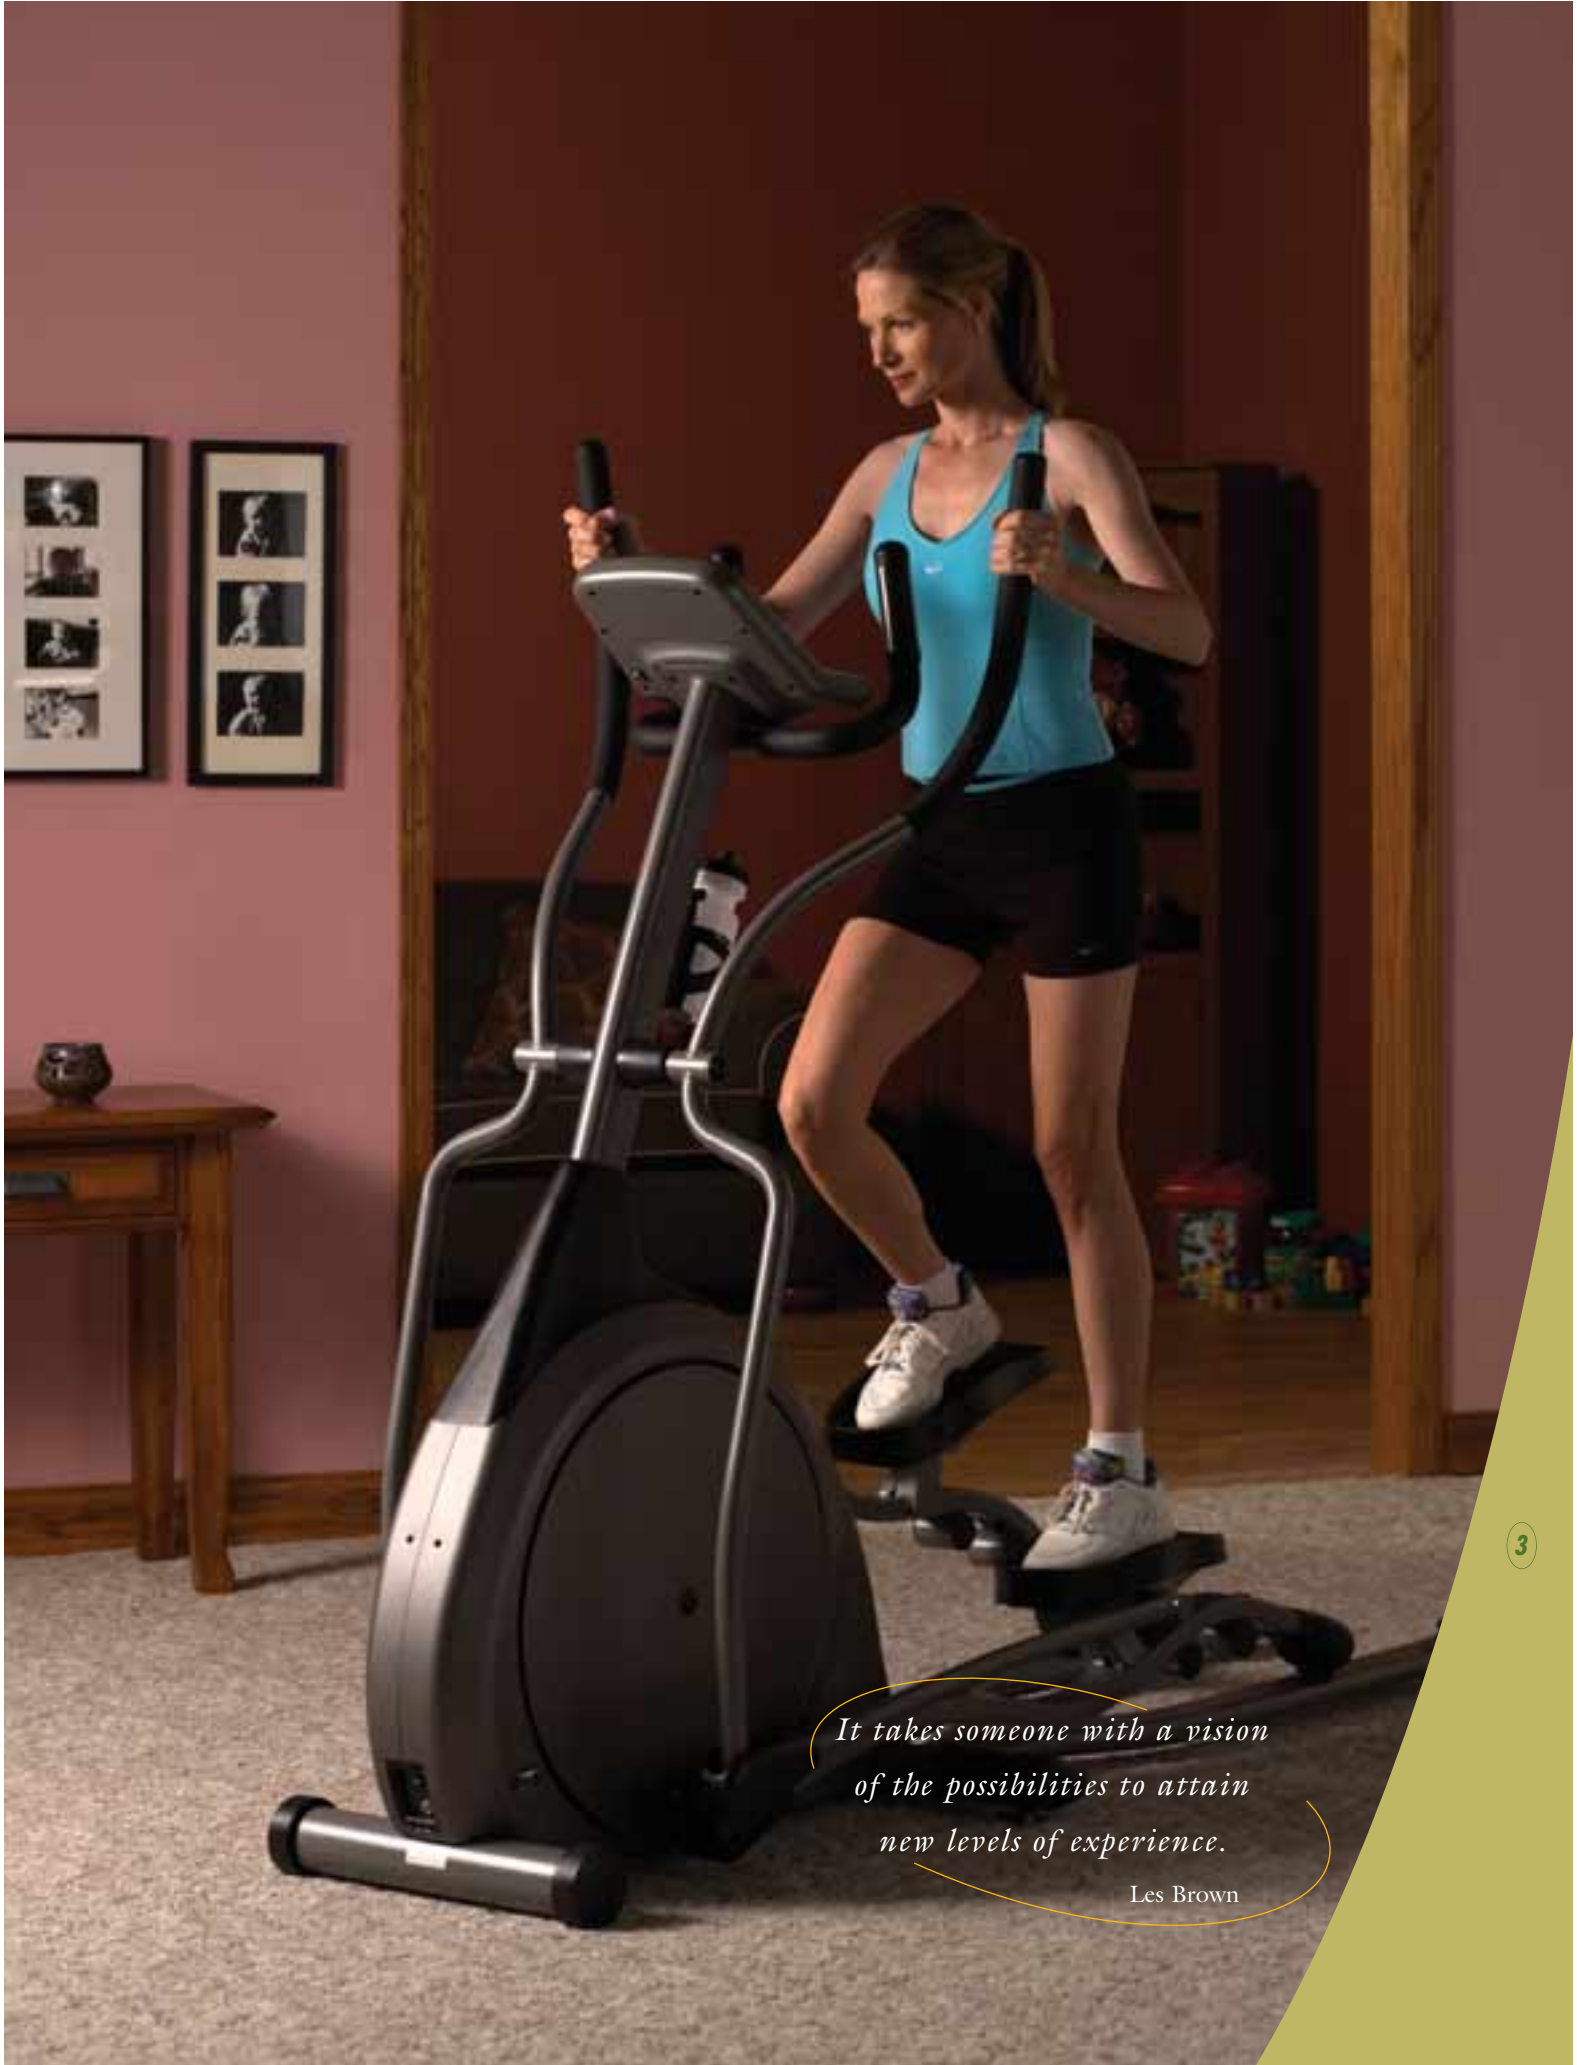

Vision Fitness knows that 80% of people stop working out and do not reach their fitness goals due to boredom. Our elliptical trainers are designed to keep you going for that extra five to 10 minutes. Features, such as motivational programming and Bio-Radius™ pedal arms, keep you going just a little longer. It is amazing how quickly those extra minutes add up to achieving your goal.

Our elliptical trainers have won numerous accolades from the media and our customers for providing the smoothest and quietest workout. If you must workout inside, you want to be sure your equipment is comfortable and quiet, so you can read a book (with the built-in reading rack) or watch TV without blasting the volume.

Our dual-action line offers the best of both worlds; it gives you the lower body workout while integrating upper body with our ergonomically designed handlebars. Our fully-padded handlebars offer multiple hand positions to custom fit each user. All of our elliptical trainers are backed by industry-leading warranties and are serviced by the best retailers in the industry.

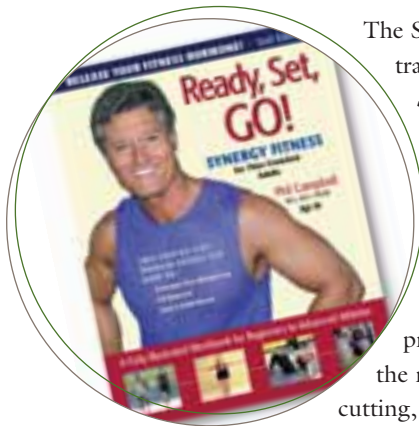

Our goal was to develop the most comfortable elliptical motion possible. We have accomplished that by combining several unique features, such as articulating (pivoting) footplates, long Bio-Radius™ pedal arms, and a 24-pound heavyweight flywheel. It is this combination, along with our long 19.75-inch stride length, that makes our elliptical trainers the smoothest and most comfortable available.

*It takes someone with a vision
of the possibilities to attain
new levels of experience.*

Les Brown

The SPRINT 8 program found on our *X6600HRT* and *200* Series elliptical trainers was developed with Phil Campbell, MS, MA, and author of *Ready, Set, Go! Synergy Fitness*. Mr. Campbell is an expert in the field of anaerobic exercise, which has been cited by numerous medical publications as the cure for somatopause or the “middle-age spread.” The “middle-age spread” is signified by energy decline, weight-gain, loss of muscle, and wrinkled skin after age 30.

Vision Fitness is the first fitness company to integrate anaerobic exercise programming (SPRINT 8) into their equipment that specifically promotes the natural release of human growth hormone. The most powerful body-fat-cutting, muscle-toning, anti-aging substance known in science—human growth hormone—is produced by the body with this type of exercise program.

Quality CHECKLIST

Vision Fitness understands that choosing the right elliptical trainer is an important decision and a large investment. We have provided a checklist below of some of the key quality features that you should look for in an elliptical trainer. Always make sure you test the elliptical before you buy it and ask, “Is the motion smooth and comfortable? Is it quiet? Can I fold it to save space? Will I use it?” Good luck at achieving your fitness goals!

- ☐ **Compact Size** One of the drawbacks of elliptical trainers is that they take up so much floor space. We have solved this problem with our patented *folding* elliptical design; Vision Fitness® elliptical trainers fold down to a compact 42"x 27" footprint.
- ☐ **Poly-V Belts** Our Quiet-Glide™ Supersilent Poly-V Belts provide a smooth and quiet ride with a larger surface area than many of our competitors.
- ☐ **Heavy Flywheels** The balanced 24-pound flywheel used on our elliptical trainers provides a smooth and consistent resistance.
- ☐ **Magnetic Resistance System** Our ECB-Plus™ System provides smooth and accurate changes in resistance.
- ☐ **Warranty** Vision Fitness® elliptical trainers come with a Lifetime Warranty on our Magnetic Resistance System. Make sure you buy a product that is backed by a company with a solid history.
- ☐ **Motivational Programming** Test the different programs. Our elliptical trainers are loaded with programs to keep you going the extra distance, and they are easy to use.
- ☐ **Specialty Fitness Retailer** There are many different options for buying an elliptical trainer (Internet, sporting goods stores and mass merchants), but they often sell bells and whistles without insuring you have the proper piece of fitness equipment. Specialty Fitness retailers specialize in fitness equipment. Your elliptical trainer should be delivered and installed in your home by experts.
- ☐ **Heavy Gauge Steel Frame** To compare frame strength, lift the elliptical trainers you are considering. Be careful, though, our elliptical trainers are heavy.
- ☐ **ISO 9001 Quality Manufacturing** All Vision Fitness® elliptical trainers are assembled in an ISO 9001-certified facility.

of seeing the invisible.*

Jonathon Swift

What separates Vision Fitness® elliptical trainers from all others? It's passion—the passion to develop the best elliptical trainers ever. This passion shows in the details that go into every Vision Fitness® elliptical trainer, whether it is the programming in our consoles that allows you to stay motivated, or the Bio-Radius™ pedal arms that provide an extra-smooth workout. Try one of our elliptical trainers, and you will feel the passion.
