iNetTV™ FITNESS PRODUCTS

INNOVATION

ENTERTAINMENT

ACHIEVEMENT

THE *Vision* *Fitness* STORY

Vision Fitness has produced innovative products since our inception in 1993 when we pioneered revolutionary magnetic resistance systems on our award winning fitness bikes.

Quality and innovation were also the focus when we introduced our treadmills in 1997 and patented folding elliptical trainers in 1998. Because of this focus, all of our product categories continue to receive “Best Buy” awards from leading consumer review publications.

Why *iNetTV*? Our goal from the beginning has been to provide you with the practical fitness tools you need to create a better, healthier life. The *iNetTV*™ Series of products are such tools. *They save you time*, the most valued commodity of all. With the *iNetTV*™ Series, you can get your workout in while watching your favorite television show or latest movie rental, surfing the internet, listening to a CD, or even playing video games. (Refer to back of brochure for a list of products with which *iNetTV*™ is ready to integrate.) No longer will indoor workouts be a mental battle with boredom!

We invite you to try the *iNetTV*™ Series of products at your local Vision Fitness retail store and experience for yourself the joy of exercise.

*H*ow does *iNetTV*™ work? Our *iNetTV*™ upright bike, semi-recumbent bike, and elliptical trainer include a sleek 12.1" Active Matrix LCD TV display. You get everything you need for a quality workout, including six programs with 16 levels for each program.

You also get a built-in Heart Rate Training program that adjusts the resistance to keep you within your target heart rate. All of your workout data is displayed at the bottom of the TV screen. A cable-ready TV tuner is also included for watching all your favorite shows. It's simple—just plug the cable line into your *iNetTV*™ product.

The benefits of *iNetTV*™ modular design:

We are amazed how fast an hourlong workout goes by when you're surfing the web. But the technology changes so fast! Who wants to spend a lot of money on a product that might be obsolete in a year? Vision Fitness has developed the most versatile of solutions with our patent-pending modular design concept.

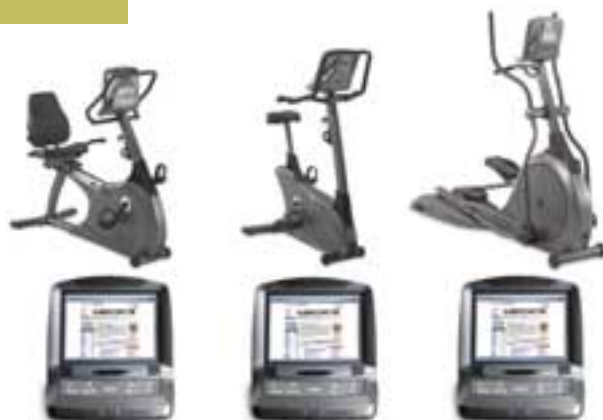

The *iNetTV*™ Series modular design will adapt to any of the rapidly developing internet technologies, whether it's PC-based, set-top devices, or cable modem boxes. You simply start with the standard unit, which has a built-in LCD TV, and expand from there.

*The world of tomorrow
belongs to the person who
has the vision today.*

Robert Schuller

R2600HRT *iNetTV*™

Options to fit anyone's needs

Never has there been a fitness machine with the versatility of an **iNetTV™** product. The products with which the **iNetTV™** Series is ready to integrate include:

(NOTE: none of these options are required for simple television viewing!)

- **PC with CD-ROM**

Surf the web and listen to your favorite music. You can watch DVD's on your PC, too.

- **Video Game System**

Hook up your favorite video game system and watch how quickly an hour goes by! You can play games and watch movies. Kids will enjoy working out, too!

- **VCR or DVD Player**

Rent a movie, or record your favorite shows while at work and replay them during your workout.
