VISION  FITNESS

LIGHT INSTITUTIONAL FITNESS PRODUCTS

The Vision Fitness Story

Vision Fitness began as a division of Trek Bicycle Company, one of the world's largest manufacturers of quality outdoor bicycles. At Trek, we pioneered the development of the smoothest and quietest exercise bikes available. In 1996, Vision Fitness was spun off by the former Trek Fitness management team to continue to bring to market innovative fitness products. We offer our customers the same combination of quality, value and performance that has made our founding company the most asked for bicycle brand in America.

Our goal is to provide you with the fitness tools you need to help you, your customers, or employees create a better, healthier life. The Vision Fitness line of equipment offers the best of both worlds for your facility - superior performance with minimal investment.

We have taken our award winning bicycles to a new level in the dual heart rate control E3600HRC Upright and R2600HRC Semi-Recumbent. Our extra long Bio-Radius™ Pedal Arms on the X6600HRC/DA and X6600HRC Elliptical Trainers assure the smoothest elliptical motion possible. Finally, our rock solid T8600 Series treadmills complete the line of the industry's best value institutional-grade fitness equipment.

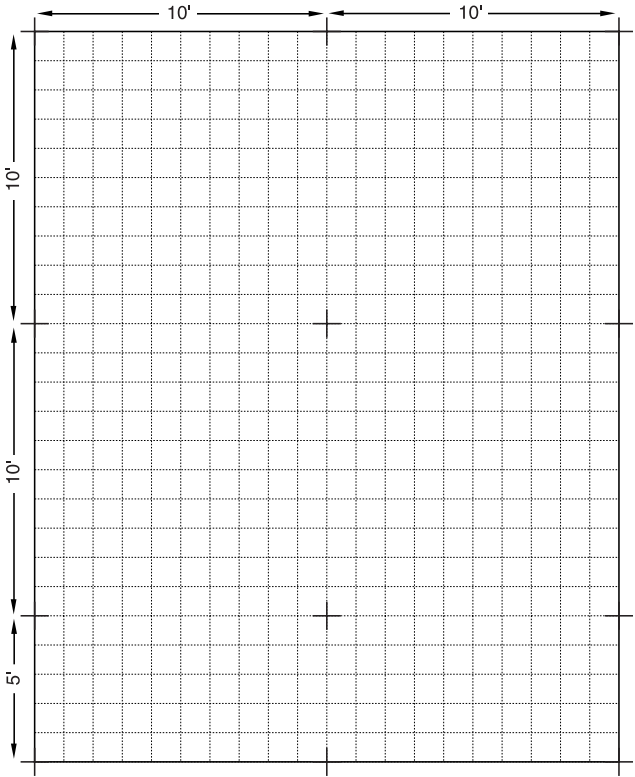

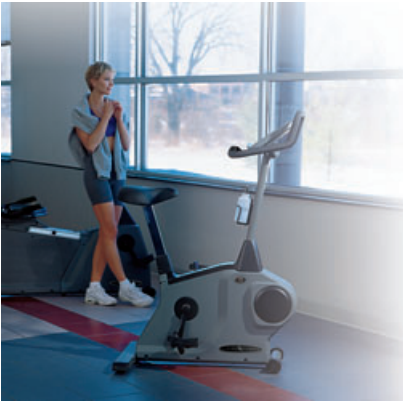

At the recent Health & Fitness trade show, our retailers awarded us the Best Customer Service in the industry. We take great pride in offering the best service in the industry to all of our customers.

We invite you to try any of our fitness equipment at your local Vision Fitness dealer and experience for yourself the *joy of exercise*.

Thank you
Greg Waters

SELECTING THE RIGHT EQUIPMENT

WHAT TYPE OF EQUIPMENT WILL BEST FIT YOUR CLIENT? Do not be overly concerned about which type of equipment is “best”. Nearly all types of aerobic equipment will deliver a beneficial workout. The more important questions are these - Which type of equipment will be used, and are you offering enough variety? Walking and running are America’s #1 participation activities with more than 67 million people participating last year. A treadmill lets you bring this favorite outdoor activity indoors. Year in and year out, exercise bikes have maintained one of the highest participation rates of all physical activities, and they rank #1 when compared to all other types of indoor fitness equipment for the age group of 55 and above. The newest form of aerobic equipment is the elliptical trainer and a recent survey shows that the elliptical trainer is the exercise of choice among users of indoor equipment who have tried it.

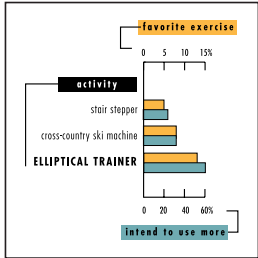

STUDY BY AMERICAN SPORTS DATA, INC.
COURTESY OF SGMA, SENIORS AGED 55 AND OVER

WHY IS IT IMPORTANT THAT THE EQUIPMENT BE THE SAME AND EASY TO USE? Having a family of equipment with the same consoles and programs makes it easy for your clients to go from machine to machine. All of the Vision Fitness machines have an **CZ•START™**, and the exercise bikes and elliptical trainer have the exact same consoles. Easy-to-use equipment keeps your clients coming back and reduces your staff’s workload.

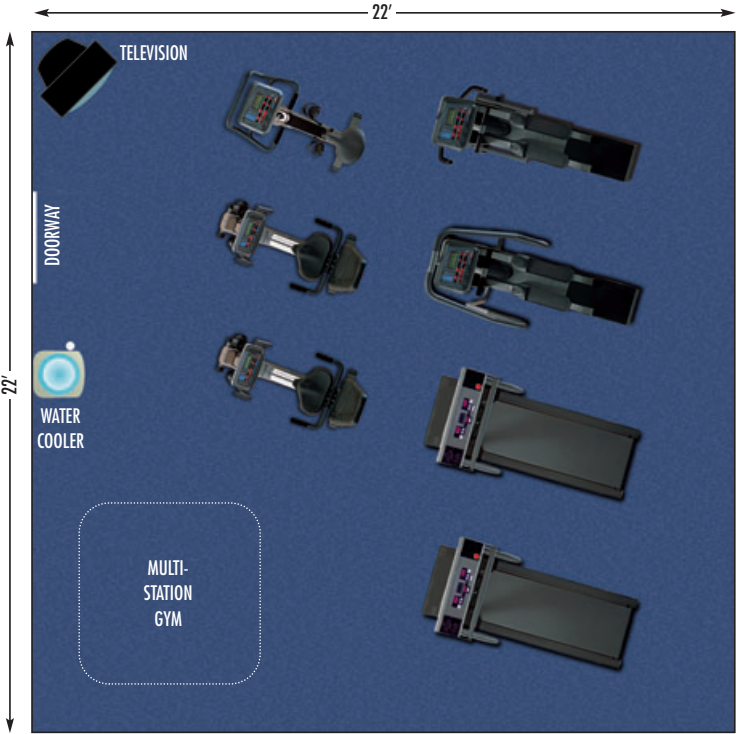

WARRANTY & DEALER SUPPORT? Vision Fitness offers a Light Commercial Warranty (Up to 5 hours use per day) for two years. Our products are sold through Vision Fitness certified dealers. These dealers are equipped with trained service departments should any maintenance or repairs be needed.

A world of options...

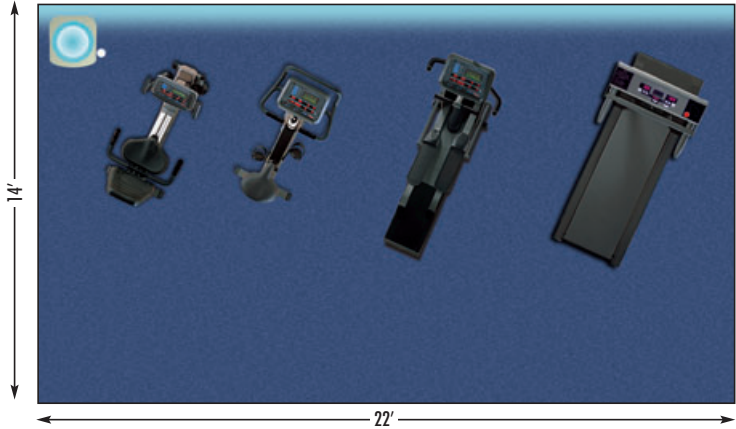

CREATING YOUR FITNESS CENTER

Whether you are a large corporation or a small business, there are some simple guidelines that we recommend in setting up your facility. These pages cover three general room lay-outs, and the inside back cover allows you to create your own room. Below are some general suggestions for setting up your facility; however, your specialty fitness representative will be able to better help in determining your specific needs.

Fitness Center Checklist

- ❑ Anti-Bacterial Carpet - makes for a cleaner fitness environment
- ❑ Water cooler w/cup dispenser
- ❑ Television with remote
- ❑ Towels available in fitness center
- ❑ Anti-Bacterial Spray to clean machines
- ❑ "Rules" Sign - makes for a safer and cleaner center
- ❑ Employee maintenance schedule
- ❑ Motivational posters
- ❑ Place treadmills a safe distance from any walls
- ❑ Phone in case of emergency
- ❑ Variety of machines - keeps clients motivated
- ❑ Space machines 2' to 3' apart

FITNESS PRODUCTS PLACED NEAR WINDOWS PROVIDE FOR A MORE ENJOYABLE WORKOUT!

BENEFITS OF EXERCISE

We recommend participating in a variety of aerobic activities. This variety will keep your clients more involved and likely to sustain their fitness program over time. Vision Fitness treadmills, exercise bikes and elliptical trainers are all excellent tools to keep your clients involved and healthy enough to enjoy their favorite outdoor activities - whether it's walking, cycling, in-line skating, or skiing.

The most important thing is to stay consistently active. In fact, the US Surgeon General recently issued a warning stating that lack of regular exercise is a recognized health risk.

FURTHER ADVANTAGES OF HAVING QUALITY FITNESS PRODUCTS AT YOUR SITE:

Vision Fitness Light Institutional products are ideal for hotels, condominiums, apartment complexes, police & fire stations, geriatric & rehab centers, and corporate fitness centers.

REDUCES SICK LEAVE AND IMPROVES PRODUCTIVITY There have been many studies that show having a fitness center not only reduces sick leave and improves productivity but also improves morale.

RETURN CUSTOMERS Having a quality fitness center will give your customers a reason to return to your business, instead of your competitors. Make sure that you call out your fitness facility in all of your marketing literature.

DECREASE YOUR MEDICAL CLAIMS Many studies have shown that a quality fitness center will actually save money in the long term. One study showed that for every dollar invested in employee health programs, \$3 to \$10 will be returned due to reduced health care claims.

MORE FAMILY Time is what we have the least of, allowing your employees to exercise at work actually gives them more family time. An employee with a balanced life will usually be more productive and loyal to their employer.

ATTRACT BETTER EMPLOYEES A corporate fitness center is viewed as a perk to new employees and could be a reason that your company gets the better employee. It will also help attract active people, which will give you lower insurance costs right from the start.

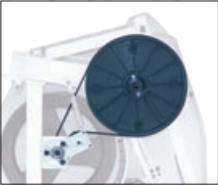

DURABILITY • RELIABILITY • LOW-MAINTENANCE • EASE OF USE

THESE WERE THE FOUR MAIN GUIDING POINTS in the development of our Light Institutional Line. Nothing frustrates a client more than an “Out of Order” sign. Institutional fitness equipment has to be durable enough to hold up to the abuses of everyday use and reliable enough to not breakdown. Low-maintenance parts and components such as top quality sealed cartridge bearings should be used throughout the machine. Finally it must be easy for your clients to use.

RELIABILITY • LOW-MAINTENANCE

QUIET GLIDE™ DRIVE We revolutionized the industry with our Quiet-Glide™ Drive technology. The 8 Ribbed Poly-V Belt and top quality one way bearing assure an extra quiet workout. A quiet piece of exercise equipment makes it easier to read a book or watch TV without disturbing others. Computer modeling on this drive shows that the expected belt life would exceed 20,000 hours. That's over 10 years of life, when used five hours a day.

DURABILITY • RELIABILITY

POWER IQ™ The Digital Concepts PWM Motor Control Board in our treadmills have built-in intelligence. If the current draw (amperage) were ever to rise above a preset limit, the board would automatically turn the power off to the motor, preventing costly damage to either the controller or the motor. The built-in Power-Off switch means that if the belt were to get jammed or stop for any reason, the treadmill would be shut off. The board can be reset by turning the power switch off for 30 seconds, then restarting.

DURABILITY • RELIABILITY

THE HEAVIER THE BETTER All of our products are made of an extra heavy gauge steel. The heavier the product the more stable the unit. We use extra-heavy flywheels in our bikes and elliptical trainer to add stability and a smoother motion. The all steel console on our treadmills creates extra lateral stability and is more durable than our competitors consoles.

Specifications

QUIET GLIDE DRIVE™
Utilizes an 8 Ribbed Poly-V Belt and top quality one-way bearing to assure an extra quiet workout

HEAVY DUTY STEEL FRAME
For a more stable workout base

POWDER PAINT COATING
Creates a durable and permanent scratch resistant coating

CAMBRIDGE MOTOR WORKS™ GENERATOR
Allows you to place the unit nearly anywhere without any electrical power

EASY SEAT ADJUSTER
Allows for quick custom seat placement.

DUAL HEART RATE CONTROL
For optimal training

CONTACT HEART RATE
Offers Heart Rate Control or feedback

E3600HRC UPRIGHT FITNESS CYCLE

Exercise bikes have been in the fitness world for many years, and are still one of the most popular forms of indoor exercise. In fact, they rate as the number one form of exercise for the age group 55 and over. With our heritage of beginning as a division of the best bicycle company in the world, you can bet our upright bikes are designed with the cyclist in mind. Our pedals are positioned at the optimum angle to the seat, to approximate standard cycling positioning.

COMFORT ARC SEAT Like the R2600HRC, the E3600HRC utilizes body contouring foam that conforms to your body for a comfortable ride. In addition, a cut-out in the nose reduces pressure on the soft tissue areas.

GET A GRIP The full wrap-around handlebar offers a variety of hand positions. It's important to be able to adjust your position during a long workout. The handlebar has a durable shock resistant coating that's also easy to clean. To display your heart rate, simply grab the contact grips on the ends of the bars at any time during your workout.

MOTIVATION AT ITS BEST The EASY-8™ LED Continual Feedback Console on the E3600HRC is the same console we use on the R2600HRC and the X6600HRC. It has six different programs, each with 16 levels to keep you interested and motivated during your workout. If you get tired of intervals, a simple push of a button puts you in the mountains of Colorado or the rolling hills of Vermont. With the EASY-8™ and a little imagination, you can go everywhere without going anywhere.

DON'T SWEAT THE DETAILS, WE DID All of the components that go into the E3600HRC are designed to fit and work together to exacting standards. That is why final assembly of all Vision Fitness products are done in an ISO 9001 Quality Certified facility. In addition, each of our exercise bikes is calibrated on a dynamometer to assure consistent and accurate resistance.

EASE OF USE

EASY-TO-USE CONSOLES All of our Light Institutional products feature our **EZ•START™** function. Exercising is as easy as getting on and pressing the Start button. Our exercise bikes and elliptical trainer use the EASY-8™ console which has an industry-leading eight continually-lit LED feedback displays. Each LED delivers specific information about your workout, from Speed to Distance to Heart Rate and more. There are six different programs to keep the workout both fun and challenging. Since all of our products have easy-to-read consoles, your clients will have no problem switching from one machine to another.

EASE OF USE

THE CUSTOM FIT Our quick adjust seat levers allow you to quickly and easily adjust the seat. The R2600HRC semi-recumbent seat adjusts while you are seated by simply pulling up on the handle and sliding the seat into a comfortable numbered position. The E3600HRC also has the numbering position on the seat post along with its positive locking adjustment pin. Both bikes come with our Comfort Arc™ saddles that are made from Body Contoured foam which conforms to your body.

DURABILITY

CORROSION RESISTANT All Vision Fitness products are electrostatically powder coated. This process protects the components from corrosive sweat and mildew to assure a longer life. This durable coating is scratch resistant to keep the product looking like new.

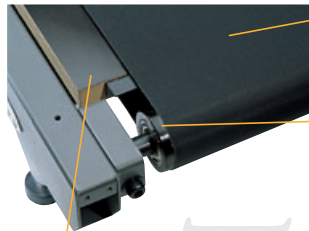

RELIABILITY

ISO 9001 QUALITY CONTROL The first step is to select the right components, the second, and equally important step is to assemble these components with consistency and precision. Final assembly of all Vision Fitness products is completed in an ISO 9001 Certified facility. In addition each of our products goes through an extensive inspection process. Important standards such as vibration and decibel readings are taken to assure only the highest quality treadmill is shipped. Each of our bikes is calibrated on a dynamometer for consistent and accurate resistance.

T8600 SERIES FULL PLATFORM TREADMILLS

We have taken a No-Compromise approach to the selection of every component used in our T8600 Series treadmills. This all starts by using only component suppliers with years of treadmill manufacturing experience. Combined, our key component suppliers have over 40 years experience in the treadmill business. An example of this is the 2.5 HP *continuous duty* Baldor motor. Baldor is the premier manufacturer of treadmill motors.

SIEGLING COOL-WEAVE™ 2-PLY BELT The Siegling Cool-Weave™ belt runs cooler than conventional belts, which adds to the longevity of the treadmill.

2.5" CROWNED ROLLER A large roller allows the running belt to be adjusted looser without slipping. Less tension on the belt allows the entire power system to run cooler by reducing the load on the roller bearing, motor and controller. A crowned roller helps the belt to self-center as you use it, without causing belt fraying or curling.

COMMERCIAL GRADE COATED DECK We use the D & P 1" Commercial grade Slik-Dek™. This deck has a prewaxed phenolic coating that impregnates the filament backing of the belt providing a low friction, long lasting coating. The deck is also coated on both sides so that after extensive use, it can be reversed for twice the life.

CONTINUOUS DUTY MOTOR

We specify only the Baldor 2.5 hp *continuous duty* motor for the T8600. Baldor uses only the finest bearings and designs into their motors easy brush access and excellent ventilation.

T8600-S CONSOLE

EZ•START™ CONSOLES Both the T8600S & T8600HRC offer our **EZ•START™** feature; simply press the Start button and begin exercising. The large "Safety Stop" Off button provides peace of mind. Rehab users will appreciate the low start speed of .5 MPH and the added security of both front and side handlebars. The T8600S allows the facility manager to limit the maximum speed for even greater control. The T8600HRC has built-in heart rate control along with 6 programs from Intervals to Weight Loss. Each of the programs has nine different levels to keep you motivated. Both models offer optional contact heart rate feedback.

Specifications

QUIET GLIDE DRIVE™
Utilizes an 8 Ribbed Poly-V Belt and top quality one-way bearing to assure an extra quiet workout

Allows for quick custom seat placement.

DUAL HEART RATE CONTROL
For optimal training

INTEGRATED READING RACK
Enjoy your favorite book or magazine while you ride

R2600HRC *semi-recumbent comfort*

R2600HRC SEMI-RECUMBENT FITNESS CYCLE

Semi-Recumbents are one of the fastest growing categories of exercise equipment, second only to elliptical trainers. The Vision Fitness R2600HRC puts to rest the myth that exercise has to hurt to be effective. Don't be misled by the comfortable relaxed cycling position. The R2600HRC delivers an aerobic workout just as effective as an upright bike while using even more leg muscles, including the quadriceps, hamstrings, and gluteus.

CLUB COMFORT ARC™ SEAT There is nothing more important than a comfortable seat. Our CLUB COMFORT ARC™ seat utilizes body contouring foam that conforms to your body for a comfortable ride. In addition, our seat offers lumbar support and an extra set of handlebars for varied hand placement. The durable vinyl seat cover is stain resistant and easily cleaned with a wipe of a towel.

EASY-TO-USE CONSOLE The EASY-8™ LED Continual Feedback Console allows you to get on the bike and ride with the simple push of the Start button. It also allows you to pick between six motivating programs, from Intervals to Weight Loss to Mountains, while constantly displaying eight different types of feedback.

IT'S ALL IN THE DETAILS What separates the R2600HRC from our competitors is in the details. The fully enclosed casing increases safety while protecting the frame and drive train from corrosive perspiration. Our rubber front wheels allow you to easily move the unit into place. From pedals to bearings, we use the most durable and reliable components available.

Specifications

DIGITAL CONCEPTS CLUB RATED PWM WITH FUSELESS CURRENT LIMIT
Protects against electrical surges and product abuse

60" X 20" BELT
Makes for a more comfortable, larger running surface

0 TO 12% PUSH BUTTON ELEVATION WITH 700LB. THRUST MOTOR
Offers extra smooth elevation control

Makes for a more stable running and walking surface

POWDER PAINT COATING
Creates a durable and permanent scratch resistant coating

OPTIONAL CONTACT HEART RATE BAR
Offers Heart Rate feedback

R2600HRC & S spaciousness defined

X6600HRC/DA & X6600HRC ELLIPTICAL TRAINERS

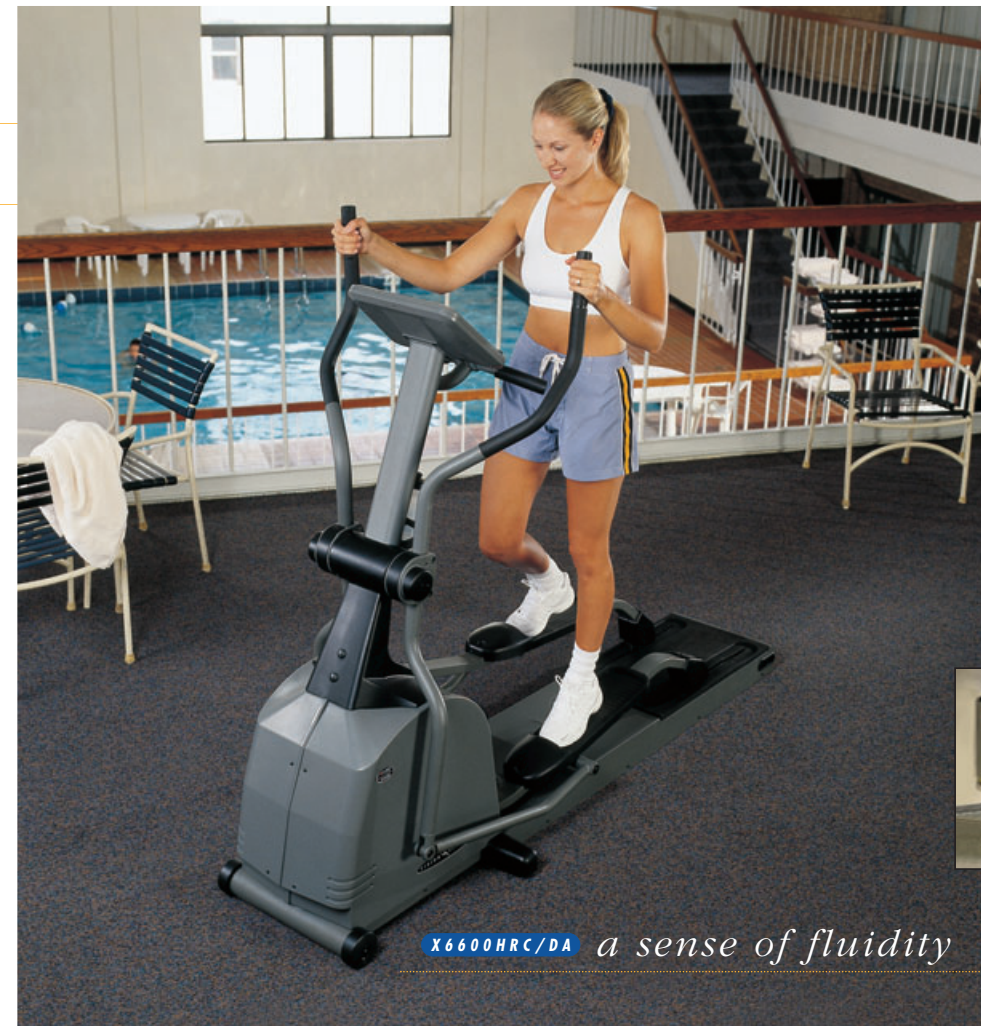

We didn't invent the elliptical trainer concept, but we did make the first elliptical trainer with our proven QUIET-GLIDE™ Drive train. Though relatively new to the fitness horizon, elliptical trainers have already earned their floor space in health clubs. Elliptical trainers offer a great workout that is both weight bearing and non-impact. A recent survey showed that the elliptical trainer is the exercise of choice among users of indoor equipment who have tried it.

BIO-RADIUS™ PEDAL ARM The best elliptical trainers use a long pedal arm to achieve the smoothest motion. Our exclusive extra long BIO-RADIUS™ Pedal Arms position your body over the center of the drive wheel for the most natural and fluid ergonomic positioning. We use an extra heavyweight flywheel to keep the action smooth through the entire elliptical motion. The combination of these two features is what separates us from the rest of the competition.

DUAL HEART RATE CONTROL Heart rate training is the most effective way to burn fat and lose weight. Best of all it's easy to do; simply enter your target heart rate into the console. The console then automatically adjusts the tension to keep you in your target heart rate zone. The EASY-8™ LED Console has both telemetric and contact heart rate to give you the best of both worlds. The telemetric heart rate utilizes a wireless transmitter worn around your chest to send your heart rate information to the console. The contact heart rate is even easier; simply grab hold of the contact handles. The other five training programs allow for heart rate feedback.

SINGLE OR DUAL ACTION The X6600HRC series comes in either a single or dual-action model. The single-action allows your clients to focus specifically on their lower body, while the dual-action integrates moving arms to add an upper body workout.

X6600HRC/DA a sense of fluidity

Specifications

QUIET GLIDE DRIVE
Utilizes a 10-Ribbed Poly-V Belt and top quality one way bearing to assure an extra quiet workout
